

## Assistant Quality Assurance Manager

### The position

Vesteraalens AS is a Norwegian producer of high-quality omega-3 products (fish oils). As an Assistant Quality Manager, you will play a central role in our company's ongoing process and product control by assisting in the operation and oversight of our company's quality and deviation system.

### Responsibilities:

- Manage sampling and coordinate external analyses
- Communication with partner laboratories
- Follow-up on analytical results and generate analytical reports (CoA)
- Develop and maintain product documentation (PDS; MSDS)
- Collect and maintain documentation of raw materials (ingredients, packaging, etc.)
- Evaluate & extend internal product analyses
- Follow-up of process analyses and stability studies

### Qualifications:

- University diploma in a relevant field (Chemistry, Biochemistry, Nutritional sciences, a.o.)
- Experience with lipid analytical methods
- Experience with quality systems, food safety & audits (GFSI, HACCP, others) would be desirable
- Proficiency in English mandatory & Norwegian desirable
- Advanced computer skills (Microsoft Office applications, especially Excel)

### Key skills:

- Structured work attitude
- Execution – perseverance, drive for results
- Good oral and written communications and presentation skills
- Time management and prioritization ability

### We offer:

- Challenging and versatile work
- Excellent working environment in an international team
- Competitive salary and great benefits (among others attractive insurance and pension plan)

Please mark your application with the job title and submit combined with your CV to [post@vesteraalens.no](mailto:post@vesteraalens.no)
