« Lipids for Global Health: Bridging Diet, Biological Systems and Clinical Impact »

- ✓ Methods – from imaging to bioinformatics
- ✓ Nutrition: new challenges surrounding lipids
- ✓ Two-way interactions between microbiota and lipids
 - ✓ Lipids in clinical pathophysiology: lipoproteins from biogenesis to functional impact
- ✓ Supramolecular lipid structures and pathophysiological relevance
 - ✓ Lipid mediators: oxylipins, endocannabinoids, and inflammation
- ✓ Clinical pharmacology, therapeutic targets, and vectorization
